Feeders for mailing,
printing and packaging

C-20

C-20 High Speed Continuous Feeder

Straight Shooter feeders are known for revolutionary features, including:

- * Buckle Separation™ for versatility
- * Complete paper guides for straight feeding
- * Repositionable feed belts
- * Independently adjustable separators
- * Simple 5 minute belt changes
- * Quick, tool-less setup

Now these features and more are available in a wide format, our C-20 high speed friction feeder!

The C-20 offers more feeder for your money than the competition. Now you can easily handle the wide stuff with a compact, cost-effective feeder that is as versatile as it is easy to use!

Straight Shooter... keeping it simple and giving it to you straight!

Buckle Separation™ Technology A Straight Shooter Exclusive!

Straight Shooter introduced this revolutionary method of separation in 2004. Other feeders use a high friction “nip” point to separate documents. Straight Shooter eliminates the “nip” point for smoother feeding without the jams!

Until now, wide format friction feeders were too costly, too cumbersome, and too complicated. Straight Shooter changes all that with the C-20 wide format feeder. Combining simple, clean design with proven features, the C-20 makes it easy to run those large documents, while still handling the small stuff.

With our optional card kit, the C-20 can handle small media down to 2" wide, without compromising the ability to feed large pieces.

The C-20 combines heavy duty design with lightweight versatility in a compact package that is easy to move from one application in your plant to another.

Now you don't have to buy multiple feeders to handle various jobs!

The C-20 comes with four independently adjustable separators and more feed belts than the competition for unlimited setup options, at a price they can't touch!

Also available:

- * **Adjustable height floor stand**
- * **Table stand**
- * **Card option for small media**
- * **Single shot and batch counting**
