

PSM1412-SS3...

An affordable Semi Automatic Stainless Steel Side Seal you can count on

The PSM1412-SS3 is designed for harsh environments. Using technology perfected in the PSM1412-IC3A, the SS3 adds additional protection from the elements by using stainless steel parts in all critical strapping head functions. In addition, the strapping head is located on the side of the machine to allow moisture to drain through the table, not through the strapping head. The table is easily adjustable, allowing the operator to strap a wide range of boxes. Here's a partial list of the features that make the PSM1412-SS3 the best value in stainless semis on the market.

- **Side Seal Structure**
Moisture and debris fall into the removable table, not into the strapping head.
- **Proven Design**
The strapping head technology is the same technology proven in thousands of applications.
- **Rapid-Heat Heating System**
Consistent, high efficiency seals. Your strap stays on and is secure.
- **Stainless Steel Frame**
304 Stainless resists rusting and corrosion much longer than standard units.
- **Stainless Steel Critical Parts**
All critical head parts are made from stainless steel to reduce corrosion.

TECHNICAL SPECIFICATIONS

Dimensions:	26.5"W x 41"D x 64"H
Table Height:	15 to 27" (adjustable)
Package Size:	Minimum 3.25"W x 1.25"H
Maximum Package Weight:	130 lbs.
Machine Weight:	250 lbs.
Tension:	10 to 100 lbs.
Cycle Speed:	2.5 seconds per cycle
Strap Size:	1/4" to 5/8" (5mm to 15mm)
Core Size:	8x8, 9x8
Power Requirements:	110V, Single phase 50/60 Hz

OPERATOR FRIENDLY CONTROL PANEL
