DOCUMENT FOLDERS

PRINTERS   TABBERS   FOLDERS AND   SOFTWARE
                               INSERTERS

INCREASE YOUR PRODUCTIVITY

Manually folding paper can get very time consuming and tedious. Whether you need to send letters, invoices, statements or direct mail pieces, Secap's document folders can get the job done substantially faster, making sure all your mailings get out fast--and on time.

The Secap® DF800 and DF900 document folders are the perfect choice for automatically folding your documents quickly and accurately. Precise folds time after time maintain your professional image and help to eliminate wasted time and materials.

Key Benefits
The Secap DF800 folds up to 13,000 documents per hour and can accommodate 500 folded documents on its optional conveyor. Or choose the Secap DF900 for increased capacity and speed, as it folds up to 20,000 documents per hour and holds 1,000 folded documents on its optional high capacity conveyor.

With a small footprint, Secap's folding machines are ideal for any office. They accept a wide variety of documents, including:

• Letters • Statements • Price Lists • Flyers • Communications
• Invoices, and more!

Improve the productivity of your office and mailing operations with features such as:
• Loads 'On the Fly' for greater efficiency
• Manual feed for short runs
• Wizard-based job set-up for ease of use

Get the mail out the door when you need to and improve communications with the Secap® DF800 and DF900 folding machines.

Types of Folds/Media Accepted
The Secap DF800/DF900 offer a range of folds from C fold, Z fold, Offset C fold to Single and Double Fold-- giving you the flexibility you need so you can present your document exactly how you want it. In addition, a wide range of paper sizes and weights can be accommodated.

DF800

The small footprint of the DF800 is ideal for any office.

SIMPLE TO USE, FLEXIBLE, AND ACCURATE

1. High Capacity Feeder
The high capacity feeder handles up to 325 sheets on the DF800 and up to 500 sheets on the DF900. These units load on the fly so there's no need to stop the machine or adjust the speed to load documents. This feature allows the machine to run continuously for greater productivity.

2. Manual Feed
This feature provides convenient folding of a small number of items. The manual feed mode facilitates daily mail and short run jobs. It accepts up to 5 sheets of pre-collated documents, stapled or unstapled.

3. Automatic Fold Plates
Automatic fold plates need no manual adjustment. The DF800 and DF900 can handle a wide range of paper weights and sizes.

4. Easy to Use Control Panel
The LCD control panel guides operators to create or edit a job with easy to follow wizards. Store and recall up to 20 pre-defined jobs with the touch of a button. Eliminate errors and wasted materials by running a trial piece so you can check exactly how your document will look once folded. Choose from 5 speed settings on the DF800 and 7 speed settings on the DF900. Increase or decrease speed while the system is running.

5. Standard Stacker or Conveyor Stacker
Both units have generous capacity stackers to receive the finished documents. The DF800 document stacker holds up to 135 documents, while the DF900 comes with a 500 capacity stacker which can be increased to hold up to 1,000 documents with the optional high capacity extension.
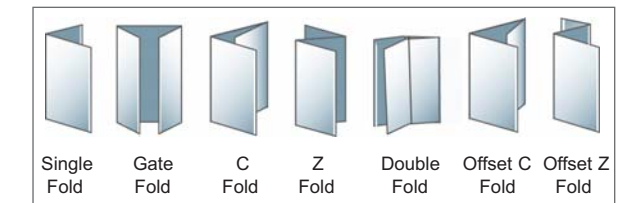

6. Folds
The DF800 and DF900 models offer the flexibility of different types of folds to meet your needs. The DF800 offers Single fold, Double fold, C fold, Z fold, and Offset C fold. The DF900 additionally offers the Gate fold and Offset Z fold. The DF900 has an optional Cross fold feature too, which is ideal for booklet applications.

4

Innovative Technology Eliminates Errors and Saves Material
• The trial piece feature allows you to see your document folded before you run your job, which reduces waste and improves productivity
• The sheet orientation icon assists you when loading documents to make sure you are inserting the pieces properly
• Double feed detection automatically stops the machine if more than one piece is fed for improved integrity of your job
• The batch counter stops the machine automatically when the required number of documents have been folded
